DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1- 7 are drawn to a ball collecting apparatus, classified in class 473, subclass 505.
- II Claims 8-11 are drawn to a method of making a tether, classified in class 273, subclass 331.

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the tether could be used as a pet leash or as a safety line.

If applicant elects the apparatus claims, the claims are further restricted by a species restriction as follows.

Group I- Tethers as shown in Fig 1-4 .

Group II- Tethers as shown in Fig 5 .

Group III - Tethers as shown in Fig 6 .

Group VI- Tethers as shown in Fig 6A

Group V- Tethers as shown in Fig 7 .

Art Unit: 3711

Group VI- Tethers as shown in Fig 8 .

Group VII- Tethers as shown in Fig 9 .

Group VIII- Tethers as shown in Fig 10 .

Group IX- Tethers as shown in Fig 13 .

Group X- Tethers as shown in Fig 19 .

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the

case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to applicant's attorney P. Furgang on 11/30/04 to request an election to the above restriction requirement. After speaking with attorney's assistant, it was agreed that the restriction would be mailed for review.
